

Moon Fragrance

The Moon is the yin, feminine power that is underlying in the heart of every woman. Moon energy inspires creative energy and builds up our every emotion. Earth Girl Creations uses this magical power of the new moon to create its natural perfume, making a small batch of high quality natural fragrances during and around this auspicious time for new creative projects. These perfumes are truly the next best thing to one's unique scent. Made with rare and precious organic or wild-crafted essential oils in a base of jojoba oil, they smell heavenly, without being overpowering. They are delicate and extraordinary scents that speak directly to our hearts. A few of my personal favorites evoked these rich imagery when I use them: Citrus Rose – a resposed and refined elegance of luxurious silks and cashmere; Lavender Rose – a younger version of Citrus Rose, but with a lighter gait, more spontaneity; Deep Forest – an instant dose of lush greenness, something I would want to carry around with me in a rush hour Central.

All perfumes are made without alcohol, synthetics, petrochemical or animal fixatives.

They come in beautiful antique bottles which are a piece of art on their own.
