

Rose Collagen Face Mask

Suitable for vegans

Perfect all year round ~ provides instant hydration after plane travel & sun exposure.

About Collagen

It is the most abundant structural protein in our bodies and keeps the skin firm and supple. From the age of 25 years it is thought that collagen tends to reduce with:

- Age
- Stress
- Overexposure to the sun
- Environmental pollution
- Smoking (accelerates the release of harmful free radicals)
- Alcohol

Animal or Plant derived collagen?

A large percentage of commercial beauty products contain collagen derived from animal tissue which are heavy and crude and are by-products from animals that have been reared in confinement with antibiotics and synthetic animal feed.

Soy is one of many phyto (plant) chemicals that are biologically active against free radicals and have a collagen stimulating effect on the skin plumping up the epidermis (top layer of the skin). We are made up of mostly water and tissue, just like plants and flowers. It makes sense to replenish our bodies with phyto-therapy.

Effect on your skin

Used regularly leads to plumper, dewier looking skin.

Suitable for all skin types -- even oily/combo skin need hydration

Ingredients:

Soy: promotes skin elasticity and hydration

Rosa damascena: skin healing and cell rejuvenating

Rose hydrosol: hydrating & softening properties

Chamomile extract: anti-inflammatory

Vitamin E: antioxidant properties to protect from UV damage

~Rose Collagen Face Mask can be used as part of your holistic anti-aging and preventative skin care treatment with all Earth Girl Creations skin care products~
